

# Black Sea: Skifska Area

## Recent Seismic Data

Under an agreement between Polar Trade & Research Associates Ltd. and the Ministry of Environmental Protection of Ukraine, Polar Trade acquired a 2D seismic survey in the Skifska and Forosa areas in 2010.

Marketing rights to this survey have now reverted to Petro Seismic Agency. The survey was acquired as a precursor to the 2012 licensing round. RPS Energy provided acquisition and processing QC staff for the survey.

# Recently Acquired Seismic Data – *Skifska Area, Black Sea*

The 2010 Skifska survey was acquired and processed by Polar Trade and Research Associates Ltd., with RPS Energy providing seismic acquisition and processing QC support.

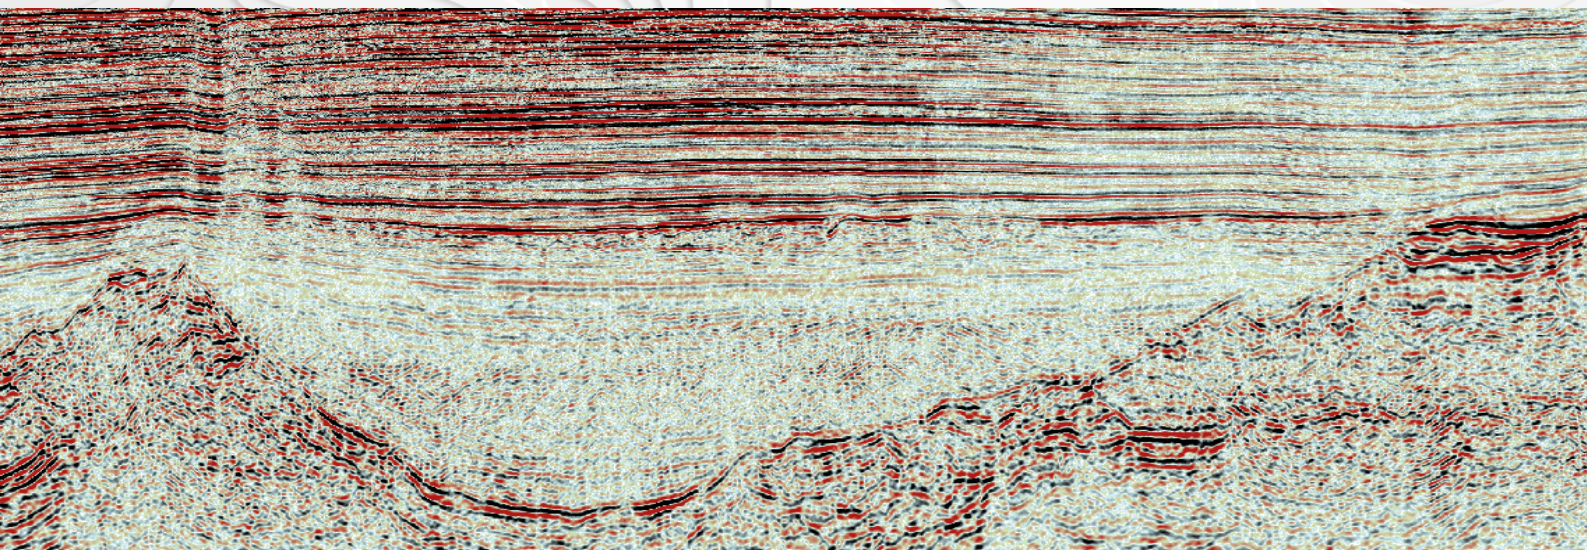

In total, over 8,800 line kms was acquired, including 2D seismic, gravity and magnetic data; the data provide excellent coverage over the Skifska area and extend into the Forosa area. The survey was acquired prior to the 2012 licensing round. This survey complements the existing BSR-2005 survey which was acquired in 2005.

## *Deliverables*

- Seismic acquisition report
- Seismic acquisition supervisor's (QC) report
- Seismic processing report
- Seismic processing supervisor's (QC) report
- PSTM CDP gathers
- Processed data - PSTM stacks (near, mid, far and full)
- Seismic velocities
- Navigation data
- Gravity and magnetics data and report

Example of seismic data from the Skifska area
